WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print one, flat, 110 mm across and 3 mm thick, in white ASA, 4 walls,
40 % infill or more, in an enclosed printer.
Centre hole 56 mm: the fan draws air up through it.
Four 5.5 mm rod holes on a 92 mm circle, 90 degrees apart
(46 from the centre); two of them line up with the arm.
Four 4.4 mm fan screw holes on a 50 mm square, centred.
The rod holes sit on the square's centre lines, the fan holes
on its diagonals.
Fit: the fan sits flat on top over the centre hole; the cowl stands on
the fan; four M4 x 40 screws go through cowl, fan and plate, nuts below.
Nuts on the four rods clamp this plate down onto the stack.
Check: the fan's corner holes line up with the four 4.4 mm holes.
