WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print one, lid down: a lid 76 x 76 x 3 mm on four legs 8 x 8 mm.
The legs stand on the fan's four corners, on a 50 mm square, and lift the lid 12 mm above the fan so the air leaves sideways.
Overall height from the top plate is 30 mm (fan 15, legs 12, lid 3).
A 4.4 mm hole runs down through each leg and the lid.
Fit: four M4 x 40 pan-head screws from the top of the lid, through the legs, the fan's corner holes and the top plate, with nuts under the plate. Tighten lightly: the fan frame is plastic.
The lid edge stays 4 mm or more clear of the rods and spacers.
Check: the lid sits level and the fan spins freely by hand.
